

## Peru Wildlife

### Peru Wildlife

Peru offers unparalleled access to the deepest parts of the Amazon, with astounding wildlife viewing opportunities. Our "Ultimate Wildlife" adventures are specially designed to increase the odds of encountering wildlife, especially rare and endangered species. No other Peruvian itinerary will expose you to so much wildlife! We feature destinations such as Tambopata and Manu, often called the most biodiverse park in the world. Local naturalist guides, wildlife and natural habitat education, special night hikes for nocturnal animals and other unique features make this truly the ultimate in wildlife adventure travel.
